UNIVERSITY OF CALICUT

About the Department

The Department of Library and Information Science at University of Calicut is one of the pioneer departments in the field of Library and Information Science education in India. The Department was established as a full-fledged department of study and research in 1985. Though a one-year Bachelor of Library and Information Science (B.L.I.Sc.) course was being offered since 1977, in 1992 the Department launched a one-year Master of Library and Information Science (M.L.I.Sc) course. In lieu of these two programmes, the Department now offers a two-year Master of Library and Information Science (M.L.I.Sc.) course through Choice Based Credit Semester System (CCSS). It has also launched M.Phil and Ph.D programmes (part-time and full-time) in Library and Information Science. The Department is leading the country in Library and Information Science education and has made a strong presence in the profession through its innovative teaching programmes, curriculum innovations, research projects, workshops, seminars, and short-term training programmes. The courses are designed to be flexible and wide-ranging, incorporating the cutting edge as well as ensuring a firm grasp of core fundamentals.

HOW TO AVOID PLAGIARISM

The Workshop

Plagiarism is one of the most serious and frequently occurring scholastic dishonesty in academia. It has always been a problem in academia, but the explosive growth of the Internet and widespread use of digital resources has made it much more common. Plagiarism occurs when another person's ideas, words, languages or images are copied or reproduced without recognized methods of citation and clearly acknowledging the source. It can happen due to a number of reasons including the lack of awareness about plagiarism and inability to express ideas because of limited vocabulary. Plagiarism, whether it is intentional or unintentional, is to be avoided at all costs and all works must be cited, paraphrased and acknowledged properly.

Objectives of the Workshop

* To ensure the participants are aware of academic plagiarism.

* To provide hands-on training to detect plagiarism.

* To provide hands-on-training in recognized methods of citation.

Target Audience

The Workshop will be of immense benefit to Research Scholars, Faculty Members and Library Professionals.

Workshop Faculty

The Workshop will be handled by experts with extensive experience in conducting awareness programs on Plagiarism & Reference Management.

Registration

There is no registration fee; however, the number of participants will be limited to 40. Registration would be on first-cum first-serve basis. The Registration Form is attached with this brochure. The participants must bring their own laptops for practical sessions.

Accommodation

Accommodation can be arranged for the participants in the University Guest House with usual amenities on first come first serve basis. Room rent and other charges are to be paid by the participants directly.

Venue of the Workshop

The Workshop will be held at the Seminar Hall, Department of Library and Information Science, situated at the main campus of the University of Calicut.

LIST OF WORKSHOPS/SEMINARS – DEPARTMENT OF PHYSICS 2017

1. One day workshop on Mathematica Software organized by the Department of Physics in association with Wolfram Research USA on 20 June 2017

One Day Workshop on Wolfram Mathematica at University of Calicut
20 June 2017

Department of Physics, University of Calicut organized a One-Day workshop on Wolfram Mathematica Software for Students, Research Scholars and College & University Teachers of Science and Engineering disciplines. The motivation behind the workshop was to give an exposure of an important Software which can do symbolic mathematical calculations, numerical calculations visualizing the data in a single module all of which are essential for learning and research activities of science and engineering. There are certain occasions like teaching simultaneous equations, introducing quantum mechanics problems like tunnelling, solving higher order coupled differential equations or other advance calculations involving vectors, where a teacher face difficulty to in solving and visualizing the results on a blackboard due to lack of time and need for long calculations. Here, Mathematica software, opens up a rare opportunity to does everything in a single window simultaneously without needing to open multiple windows as other software like Matlab Python does. Furthermore, the software's online cloud facility is free without charges and can do good amount of computations needed for learning and research. There are software which do independently symbolic calculations, numerical calculations and the others do visualizing the data using plotting single and multiple data in an appealing manner which the users are interested.

More than 70 participants enthusiastically attended the program till the end. Prof. G. Govindaraj, Professor of Physics and an expert of Mathematica came as a resource person along with faculty members from the host department lead the classes and hands-on sessions.
